UI/UX Design Plan – App Flow

Week 1-2: Group Management Module

Focus: Design user interface and experience for managing group activities.

Screens to Design:

- Group Management main page
- Sub-Groups page
- Contributions page
- Donations page
- Invites page

UX Considerations:

- Clear hierarchy between groups and sub-groups
- Easy flow for inviting users and tracking responses
- Transparent display of contributions & donation history

Deliverables:

- Wireframes to Hi-fi mockups
- Navigation and modal behaviors

Week 3: Loans Module

Focus: Design the full loan application flow and interface.

Screens to Design:

- Loans landing page (overview)
- Loan type selection: Personal vs Business
- Loan application form (step-based if long)
- Loan summary & status tracking page

UX Considerations:

- Progressive disclosure in long forms
- Accessibility in financial input handling
- Easy comparison between loan types

Deliverables:

- Interactive prototype for application flow
- Form validation UI states (errors, success, in progress)

Week 4: Insurance Module

Focus: Design the user experience around insurance plans and providers.

Screens to Design:

- Insurance overview/dashboard
- Provider listing page
- Provider detail page
- Insurance application/quote page (optional)

UX Considerations:

- Filter/search for providers
- Clean display of insurance benefits/features
- Minimal steps to view/apply for a plan

Deliverables:

- Fully designed module with real data examples
- Hover, click, and empty state interactions

Week 5: Interface Polish & Interaction States

Focus: Add consistency and interactivity across all designs.

Screens to Design:

- Standardize components (buttons, inputs, cards)
- Design states: hover, active, disabled
- Create modal and popup designs
- Banners, and alert system styling

UX Considerations:

- Accessible contrast & font sizing
- Visual loading indicators

Deliverables:

- Full UI kit / design system
- Updated prototype with transitions
